Front view

Right view

Right view (with optional devices installed)

The hatched parts indicate optional devices in this figure.

2.2.2 Installation environment

Install this machine in a location that can support its weight, including consumables and paper.

Configuration	Weight
Main unit (including Imaging Unit and Waste Toner Bottle)	d-Color MF 3800 : Approx. 102-1/16 lb (46.3 kg) d-Color MF 3300 : Approx. 101-7/8 lb (46.2 kg)
Main unit (including Imaging Unit , Toner Cartridge , and Waste Toner Bottle)	d-Color MF 3800 : Approx. 104-15/16 lb (47.6 kg) d-Color MF 3300 : Approx. 104-11/16 lb (47.5 kg)

Install this machine in the place shown below.

- Stable and horizontal (inclination around this machine: 1 degree or less) location with a hard, even surface
- To check whether the installation location is level, use a normal round pencil. If the pencil rolls, the location is not horizontal. Ensure this machine is horizontal, and make sure that there are no objects such as cables caught under this machine.
- Location close to a dedicated power outlet that is grounded
- Location close to your computer
- Sufficiently spacious location that ensures ease of use and appropriate air ventilation
- Location in which ambient temperature is 50°F to 86°F (10°C to 30°C) and humidity is 15% to 85%

Do not install this machine in the locations described below.

- Location exposed to direct sunlight
- Location in which excessive differences in temperature and humidity are detected due to close proximity to a heater or cooling equipment
- Location exposed to direct flame or combustible materials
- Location close to equipment such as a copy machine or air-conditioner that generates noise, or equipment such as a refrigerator that generates a strong magnetic or electromagnetic force
- Location close to water, water pipes, or fluid (drink) containers, corrosive chemicals, or corrosive gases such as ammonia
- Location in which fine metallic pieces such as clips or staples are scattered
- Location subject to thumping vibrations

Tips

- Do not connect to the same power outlet as that used for a high-current equipment.
- If this machine is installed in or moved to an environment subject to excessive changes in temperature, condensation will form in this machine, which may reduce printing quality. If condensation is detected, leave this machine for approximately 1 hour before using it to adjust to the environment.
- When using a humidifier or vaporizer in the room where this machine is installed, use purified or distilled water. If impurities in water are emitted into the air, they will collect in this machine and reduce printing quality.

A large, bold, black number '3' is centered within a gray square. The square is positioned to the left of the text 'About This Machine'.

3.3 How to use a Finisher

If you use an optional **Finisher**, you can easily staple printed sheets together in the corner. This is convenient when you want to bind a set of printed sheets as a document such as a project book.

To staple, load the corners of sheets into the **Finisher**.

NOTICE

*When stapling consecutively, wait for 3 or more seconds after each stapling process finishes to prevent the internal temperature of the **Finisher** from increasing, then load the next set of sheets into the finisher.*

Tips

- Up to 20 sheets (plain paper 90 g/m²) can be stapled together at one time.
- If the **Finisher** fails to operate correctly, turn the power of the machine off and on, then reset the **Finisher**.
- Paper with a borderless printed image cannot be detected by the sensor, and therefore, cannot be stapled. Do not load paper with a borderless printed image.

5 Loading the Original

5.1 Loading the original into the ADF

Original available for ADF

Item	Specifications
Original types	Plain paper (13-5/16 lb to 34-1/16 lb (50 g/m ² to 128 g/m ²))
Max. original size	A4 or Legal 8-1/2 inches × 14 inches (216 mm × 356 mm) (Fax only: 8-1/2 inches × 39-3/8 inches (216 mm × 1000 mm))
Original loading capacity	Max. 50 sheets (21-1/4 lb (80 g/m ²))

Do not load the following originals into the **ADF**. Doing so may cause an original paper jam, or damage the originals.

- Wrinkled, folded, curled, or torn originals
- Highly translucent or transparent originals, such as transparencies or diazo photosensitive paper
- Coated originals such as carbon-backed paper
- Original that is less than basic weight 13-5/16 lb (50 g/m²) or greater than 34-1/16 lb (128 g/m²)
- Originals that are bound, for example, with staples or paper clips
- Originals that are bound in booklet form
- Originals with pages bound together with glue
- Originals with pages that have had cutouts removed or that are cutouts
- Label sheets
- Offset printing masters
- Developing paper
- Glossy original such as gloss coated paper

Loading the original into the ADF

The **ADF** feeds original sheets one by one in order from the top, and automatically loads them. It also loads a 2-sided original automatically.

The **ADF** is helpful when loading a large number of original.

- 1 Put the first page of an original at the top, and load the original into the **Document Feed Tray** with the side to be photocopied facing upward.

- Load the original so that its top side is placed at the back. When loading in a different orientation, be sure to specify the loading direction of originals.

NOTICE

*Do not load more than 50 sheets at a time into **Document Feed Tray**, and do not load the sheets up to the point where the top of the stack is higher than the ▼ mark. Doing so may cause the originals to jam, damage the originals and/or **ADF** failure. However, if the original contains more than 50 pages, it can be scanned separately.*

- 2 Slide the **Document Guide** to fit the loaded original.

5.2 Loading the original onto the Original Glass

Original available on the Original Glass

Item	Specifications
Original types	Sheets, books (two-page spread), cards, three-dimensional objects
Max. original size	A4 or Legal
Original loading capacity	Max. 6-5/8 lb (3 kg)

Loading the original onto the Original Glass

Using the **Original Glass** allows you to scan an original such as a book or card, which is not available in the **ADF**.

- 1 Open the **ADF**.
- 2 Load the original into the **Original Glass** with the side to be photocopied facing downward.

- Place the top side of the original at the back, and align the original to the mark  at the left rear of the **Original Scale**. When loading in a different orientation, be sure to specify the loading direction of originals.
- When copying a highly transparent original such as transparencies or tracing paper, place a blank sheet that is the same size as the original on the original to enable clear scanning.

NOTICE

Do not place an original heavier than 3 kg on the original glass. Furthermore, do not use excessive force to press down on a book or any other form of original that must be spread on the original glass. Otherwise, the machine may be damaged or a failure may occur.

- 3 Close the **ADF**.

NOTICE

*When placing a thick book or a three-dimensional object on the original glass, you do not need to close the **ADF** to scan it. A bright light may be emitted through the **Original Glass**. Be careful not to look directly at it. Note, however, that the light coming through the original glass is not a laser beam, and will not expose the user to related hazards.*

Tips

- For all paper sizes, the area excluding 3/16 inches (4.2 mm) from the paper edge at printing and 3/16 inches (4 mm) from the paper edge at copying is judged to be a printable area. When configuring a user setting of the page size using the application, specify the paper size within the printable area so that the optimal result is obtained.
- On an envelope, it is only possible to print on the front (address) side. Also, the result of printing on the seal overlapping part on the front side cannot be assured. The area that cannot be assured varies depending on envelope types.
- The page margin setting is determined depending on your application. If the default paper size or margin is selected, there may be some part of the paper that is not able to be printed on. To obtain the optimal result, configure the custom setting so that an image is included in the printable area of this machine.

6.1.3 Precautions for correct operations

Unavailable paper

Do not load the following types of paper into the tray. Not observing these precautions may lead to reduced print quality, a paper jam, or machine damage.

- Paper that has been printed on using a heat-transfer printer or an inkjet printer
- Folded, curled, wrinkled, or torn paper
- Paper that has been left unwrapped for a long period of time
- Paper that is damp, perforated, or that has been hole punched
- Extremely smooth or extremely rough paper, or paper with an uneven surface
- Treated paper such as carbon-backed paper, thermal paper, pressure-sensitive paper, or iron-on transfer paper
- Paper that has been decorated with foil or embossing
- Paper of a non-standard shape (paper that is not rectangular)
- Paper that is bound with glue, staples or paper clips
- Paper with labels attached
- Paper with ribbons, hooks, buttons, etc., attached
- Paper with different paper quality (roughness) on the front and back sides
- Paper that is too thin or too thick
- Paper containing static electricity
- Acidic paper
- Other types of unavailable paper

Storing paper

To store paper, be sure to note the following points.

- Store paper on an even, horizontal surface, and do not take the paper out of its packaging until it is loaded into a tray. If paper is left for a long period of time outside its package, it may cause a paper jam.
- When not using paper that has been taken out of its package once, return it to the original package and store it in a horizontal, cool, dark place.
- Do not store paper in locations or in environments that are:
 - Too humid
 - Exposed to direct sunlight
 - Subject to high temperatures (95°F (35°C) or more)
 - Too dusty
- Do not set paper against the other or store it vertically.

Tips

When purchasing a large quantity of paper or special paper, carry out a trial print to check the printing quality in advance.

Media Feed Roller	Approx. 300,000 pages

Tips

- The above indicates a numeric value for 1-sided printing with A4- or letter-size paper. The actual operating life varies (decreases) depending on printing conditions (printing ratio, paper size, etc.), printing method such as the continuous printing (a print job of four pages on average is optimal for consumables) or the intermittent printing (when a print job of one page is executed multiple times), and the paper type such as thick paper printing. It is also affected by the ambient temperature and humidity.
- In a color printer, all toners are consumed in minute amounts regardless of black and white printing or color printing at the time of initialization by machine power-on or -off or automatic adjustment to maintain printing quality. Even when printing in black and white, color toners are consumed, and their cartridges must be replaced.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

“License” shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

“Licensor” shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

“Legal Entity” shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, “control” means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

“You” (or “Your”) shall mean an individual or Legal Entity exercising permissions granted by this License.

“Source” form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

“Object” form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

“Work” shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

“Derivative Works” shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

“Contribution” shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, “submitted” means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as “Not a Contribution.”

“Contributor” shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License.

Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License.

Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution.

You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- a. You must give any other recipients of the Work or Derivative Works a copy of this License; and
- b. You must cause any modified files to carry prominent notices stating that You changed the files; and
- c. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- d. If the Work includes a “NOTICE” text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License. You may add Your own copyright

statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions.

Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks.

This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty.

Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability.

In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability.

While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

DIRECTIVE 2002/96/EC ON THE TREATMENT, COLLECTION, RECYCLING AND DISPOSAL OF ELECTRIC AND ELECTRONIC DEVICES AND THEIR COMPONENTS

INFORMATION

1. FOR COUNTRIES IN THE EUROPEAN UNION (EU)

The disposal of electric and electronic devices as solid urban waste is strictly prohibited: it must be collected separately.

The dumping of these devices at unequipped and unauthorized places may have hazardous effects on health and the environment.

Offenders will be subjected to the penalties and measures laid down by the law.

To dispose of our devices correctly:

- a) Contact the Local Authorities, who will give you the practical information you need and the instructions for handling the waste correctly, for example: location and times of the waste collection centres, etc.
- b) When you purchase a new device of ours, give a used device similar to the one purchased to our dealer for disposal.

The crossed dustbin symbol on the device means that:

- when it to be disposed of, the device is to be taken to the equipped waste collection centres and is to be handled separately from urban waste;
- The producer guarantees the activation of the treatment, collection, recycling and disposal procedures in accordance with Directive 2002/96/EC (and subsequent amendments).

2. FOR OTHER COUNTRIES (NOT IN THE EU)

The treatment, collection, recycling and disposal of electric and electronic devices will be carried out in accordance with the laws in force in the country in question.
